SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/07/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/729,998

Applicant(s)

KIM, DONG-YEON

Examiner

Ilwoo Park

Art Unit

2182

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,4-10 and 17 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,4-10 and 17 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/3/2007 has been entered.
2. Claim 17 is added in response to the last office action. Claims 1, 4-10, and 17 are presented for examination. Thorland et al was cited in the last office action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 6-10 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Thorland et al., US patent No. 6,457,071.

As to claim 6, Thorland et al teach a method of indicating a connection state of an input/output cable [connection cable 201] via which an AT Attachment Packet

Interface (ATAPI) drive [col. 1, lines 23-26] communicates with a host [host computer 100 in fig. 1], the method comprising:

when power is applied to the AT Attachment Packet Interface (ATAPI) drive, setting a flag that checks [col. 7, lines 23-32] the connection state of the input/output cable;

if a command [col. 6, lines 27-38] is not received from the host for a predetermined period of time ["certain period of time" in col. 9, lines 18-28] after the flag is set, commanding a timer to increase a time counter [e.g., until the "certain period of time" reaches during power-up of the system]; and

if the increased time exceeds a reference time ["certain period of time" in col. 9, lines 18-28], indicating [col. 9, lines 18-28] that the input/output cable is not connected to the host.

5. As to claims 7 and 9, Thorland et al teach the controller clears the set flag when the command is received from the host for the predetermined period of time [col. 7, lines 33-39].

6. As to claim 8, Thorland et al teach the controller clears the set flag after the indicator indicates that the input/output cable is not connected to the host [col. 7, lines 33-39; col. 8, lines 49-54; col. 10, lines 39-42].

7. As to claim 10, Thorland et al teach if the command is received from the host, signaling that the input/output cable is connected [col. 8, lines 49-54].

8. As to claim 17, Thorland et al teach turning on a light emitting diode indicating that the input/output cable is not connected to the host computer [col. 9, lines 24-29].

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 1, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thorland et al., US patent No. 6,457,071.

As to claim 1, Thorland et al teach an apparatus [software and/or hardware in col. 11, lines 49-53] for indicating a connection state of an input/output cable, comprising:

an indicator [col. 9, lines 18-28] that is a communication device between an AT Attachment Packet Interface (ATAPI) drive [col. 1, lines 23-26] and a host [host computer 100 in fig. 1] interconnected via the input/output cable [connection cable 201] and that indicates [col. 9, lines 18-28] in response to a control signal whether the AT Attachment Packet Interface (ATAPI) drive is connected to or disconnected from the host via the input/output cable; and

a controller that sets a flag to check [col. 7, lines 23-32] the connection state of the input/output cable, when power is applied to the AT Attachment Packet Interface (ATAPI) drive, and outputs [col. 7, lines 33-39] the control signal to the indicator to indicate that the input/output cable is not connected to the host when a command [col. 6, lines 27-38] is not received from the host for a predetermined period of time ['certain period of time' in col. 9, lines 18-28; col. 7, lines 49-54]; and

a timer that counts a time required for receiving the command from the host [col. 9, lines 18-28; col. 7, lines 49-54],

wherein the indicator is a light emitting diode [col. 9, lines 24-29].

However, Thorland et al do not disclose the indicator turns on in response to the control signal output from the controller, when the host is connected to the AT Attachment Packet Interface (ATAPI) drive via the input/output cable, and turns off when the host is not connected to the AT Attachment Packet Interface (ATAPI) drive via the input/output cable. Rather, Thorland et al oppositely disclose the indicator turns off in response to the control signal output from the controller, when the host is connected to the AT Attachment Packet Interface (ATAPI) drive via the input/output cable, and turns on when the host is not connected to the AT Attachment Packet Interface (ATAPI) drive via the input/output cable [col. 9, lines 18-28]; however, it would be obvious to one of ordinary skill in the art as a design choice.

11. As to claim 4, Thorland et al teach the controller clears the set flag when the command is received from the host for the predetermined period of time [col. 7, lines 33-39].

12. As to claim 5, Thorland et al teach the controller clears the set flag after the indicator indicates that the input/output cable is not connected to the host [col. 7, lines 33-39; col. 8, lines 49-54; col. 10, lines 39-42].

Conclusion

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ilwoo Park whose telephone number is (571) 272-4155.

Art Unit: 2182

The examiner can normally be reached on Monday through Friday from 9:00 AM to 5:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Huynh can be reached on (571) 272-4147. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
